

Assessment Feedback Cover Sheet	School of Architecture, Built Environment, Computing, and Engineering	 BIRMINGHAM CITY University
Student Name	Michael Omotuyi	
Module Code/Title	CMP4266	
Assessment Item	Design, development and testing of the Hospital Management System- (Total weight 50%)	
Marker Name	Hadeel Saadany	Date 28/01/2026
- Should you have any questions about the individual item or would like to discuss your mark further, please email the marker directly and we are aiming to get back to you within 2 working days. - All the exercises of your submission were manually marked.		

Part A – Design documentation (weight 10%)		
Login Flow chart 1		Marks
1. Start/end state correctly modelled	1	1
2. Login process correctly	2	2
3. The diagram use UML symbols correctly	1	1
Total	4	4
Flow chart 2		
1. Start/end state correctly modelled	1	1
2. Complex process correctly modelled	4	4
3. The diagram use UML symbols correctly	1	1
Total	6	6
TOTAL A	10	10
Part B – System development (weight 30%)		
Achieving a mark to maximum of 40%		
Create the necessary classes and functions which allow Admins to perform the following tasks:		Marks
1. Admin Login	1	1
2. Register/view/update/delete doctor	8	8
3. View patient	1	1
4. Can assign doctor to a patient	2	2
Total	12	12
To achieve a mark of 41% to maximum of 50%		
The application must implement all the above and the following:		
5. Discharge a patient account i.e. remove patient from the system	1	1
6. Admins can view the discharged patient list	1	1
7. Update admin own information i.e. name and address	1	1
Total	3	3

Achieving a mark of 51% to maximum of 70%		
The application must implement all the above and the following:		
8. Patients have names, symptoms, age, mobile, address etc.	1	0
9. Patients of the same family are grouped together by Admin	2	0
10. The hospital system should be able to store and load all patients' data from and into a file	3	0
Total	6	0
Achieving a mark of 71% to maximum 80%		
The application must implement all the above and the following:		
11. Relocating patients from one doctor to another	1	1
12. Admins can request a management report. This should show the following information;		
a. Total number of doctors in the system	0.5	0
b. Total number of patients per doctor	0.5	0
c. Total number of appointments per month per doctor	0.5	0
d. Total number of patients based on the illness type	0.5	0
Total	3	1
To achieve a mark of 80% and over		
The application must implement all the above and the following:		
13. View diagrams of the reports from a, b, c, and d.	1	0
14. Development of a suitable Graphical User Interface (GUI) to perform all the above banking functions.	5	5
Total	6	5
TOTAL B	30	21
Part C – Testing and evaluation (weight 10%)		
Test Case		Marks
10 Test Cases	10	10
TOTAL C	10	10
TOTAL (A+B+C)	50	41

Comments:

Excellent effort. There are some functions in the test case report that are not implemented in the main file (e.g group patients by family). Overall, well done!
